

CHIPS

- Roulette can be played using either cash chips or coloured chips.
- Chips can only be purchased at the tables.
- Colour chips are unique to the table you are playing on and differentiate your bet from all the other bets on the table.
- When you purchase colour chips you are allocated a different colour to anyone else playing on the table.
- Colour chips are most frequently purchased at the table minimum, but may be purchased at higher denominations if desired.
- Colour chips must be converted into cash chips when you finish playing or move to another table.
- Cash chips can be used at any gaming table throughout the casino.

For further information about Roulette, please ask any of our friendly staff at the Roulette table.

HOW TO PLAY

1. Place your chip/s on whichever number or number combinations you think will be lucky.
2. The Dealer will help you place your bets if you require assistance but it is your responsibility to make sure that the bets are placed correctly.
3. The Dealer spins the ball.
4. You may continue to place bets until the Dealer announces that no more bets may be placed.
5. After the ball drops into a number on the wheel, the Dealer announces the number and places a marker called a dolly on the corresponding number on the table. This is the winning number.
6. The Dealer clears the table, leaving all the winning bets and then pays them accordingly.
